

Outsourcing Contract Logistics for Your Resource Management

If you're a fast-moving manufacturer or supplier looking to optimize existing facilities or grow your business in a new location, then you understand the headaches logistics can cause.

At Cura Group, we began by building, operating, and managing turnkey third-party operations. Today, we help overcome obstacles that prevent a fast, efficient, and seamless transition to tailored warehousing-as-a-service solutions in your facilities or ours.

We provide flexible contract logistics alternatives for companies needing reliable, cost-effective supply chain operations. Let us:

- Optimize layouts of existing facilities for improved team efficiency
- Implement WMS systems for real-time inventory visibility
- Establish KPIs to measure and optimize ongoing performance
- Handle daily assembly, pick, pack, and shipping to job sites
- Facilitate online and in-person orders and fulfillment all in one place
- Manage staffing, training, and payroll for all facility operations

Cura's enterprise-level contract logistics services can include strategic sales assistance, assembly, private label development and placement, expert account management, and responsive inventory management — all priced for any budget!

Ask for a quote to learn how we can manage your current and future warehousing needs and deliver JIT inventory to your operations and customers.
