

We Build, Operate, and Manage Distribution Centers for Any Size Business

Cura Group

Cura is a full-service supply chain firm with expertise in building, operating, and managing distribution facilities.

With roots in last-mile logistics, we're known for opening fully-staffed distribution centers that make it easy to deliver fast-moving, time-sensitive inventory in hard-to-serve locations.

Why work with Cura for your last-mile distribution needs?

Cura Group specializes in providing customized warehousing and fulfillment options for small to medium-sized companies needing reliable, cost-effective, and convenient distribution solutions.

- Keep critical inventory accessible with nearby point-of-use storage
- All the benefits of online and in-person order and fulfillment in one place
- Provide fast delivery to your customers any time, day or night
- Turnkey execution from site selection to daily operations
- Take advantage of big-company solutions priced for any budget

Our firm facilitates expansion into physical locations without the traditional investment in real estate and location development. We help e-commerce retailers, direct-to-distributor brands, and maintenance, repair, and operations companies (MROs) avoid supply chain delays, control rising freight costs, and access new business in areas where other suppliers can't deliver.

Reduce Costs

Cut warehouse overhead and labor expenses. We manage all the details of building and running a parts distribution center.

Improve Efficiency

Save time and avoid shipping charges with on-site, 24/7 fulfillment for routine or emergency maintenance and repairs.

Expand Reach

We'll advise on a strategic location with the greatest market penetration for your stand-alone or shared facility.

Anticipate Customer Needs

Build your brand with consistent, personalized service when you always have the right inventory in the right place at the right time.

Partner With Professionals

Our team can take you from facility concept to fully operational in less than six months.
